

Blackboard 8 – Submit button missing when taking timed tests using Microsoft Internet Explorer version 8

Issue:

Students using Microsoft Internet Explorer version 8 and Blackboard version 8 have identified a problem with taking timed tests and viewing the Submit button. Students are unable to submit their test since the Submit button is not available. This problem is identified by Internet Explorer version 8 users only.

Workaround:

Identify which version of Microsoft Internet Explorer browser you are using. Open Internet Explorer and locate the **Help** button on the browser command toolbar. Select the **Help** button and select **About Internet Explorer**; verify you are using Microsoft Internet Explorer version 8.

If you are using Internet Explorer version 8, set the **Compatibility View Settings** by selecting **Page** and **Compatibility View Settings**. From the Compatibility View Settings window, select **Display All websites in Compatibility View**, select **Close**.
